

ADVANTAGES

- Refillable media cells
- Optional prefilter, final filter, and fan sections
- Predicted removal efficiency and lifetime by Camfil's proprietary software
- Contact time range 0.5 second
- Air flows range from 1000 to 24,400 m3/h
- Flexible design for supply, recirculation or exhaust air

Application	When elimination of corrosive or toxic gases is essential to meet the tightest environmental conditions that are specified by machinery manufacturers.
Frame	Stainless steel;Steel, painted
Media	Activated Carbon;Impregnated Activated Carbon;Impregnated Activated Alumina
Max Temperature (°C)	90
Min Temperature (°C)	-21
Installation Options	Ducted units typically installed on a concrete pad or roof assembly. See manual for instructions. Power is required if supplied with a fan and/or control panel.
